ABSTRACT

In 1972 Kentucky's 299 public high schools produced 41,040 graduates, or 70.2% of the total number of 1968-69 ninth graders. The 51 non-public high schools graduated 3,806 students, or 77.2% of their 1969 ninth graders. Compared to the class of 1960, the increase in number of graduates was 15,319 or 59.6%. Directly attributable to increased holding power is 5,020 or approximately one in nine 1972 graduates. Of the 299 complete high schools, 21 (or 7.0%) had graduating classes of less than 30. Primary data sources are principals' annual reports, superintendents' end of year reports, and the "Biennial Report of the State Superintendent of Public Instruction". Three basic tables in Part I provide an overview of the number and whereabouts of 1972 graduates of all Kentucky public and non-public high schools, separately and combined. Also given is a comprehensive overview by county and region of total ninth grade enrollment, graduates, and total graduates to college. Part II shows trends in holding power by summarizing data on ten graduating classes of public, non-public and combined high schools from 1963 to 1972 and includes data on survival rates and whereabouts of graduates. An analysis of relationship in school size, ninth grade enrollment, number of graduates, and graduates entering college is presented. Relative county standings are shown in measures of holding power, graduates, and survival rate of ninth grade to college. (DS)

FOREWORD

Viewing in historical perspective the high school of today reveals significant change and strong evidence of an emerging readiness of most schools to serve all the needs of all the youth in the years ahead. Documenting the change is the seventeenth annual report on holding power and whereabouts of Kentucky high school graduates. Starting in 1956, the replication of this report has helped to provide objective measures of the growth and development of the secondary education program in Kentucky.

The comparative analysis of the data relating to the class of 1972 in terms of the class of 1960, provides much tangible evidence of continuing progress. The growth has been significant and uninterrupted. The birth rate showing a sharp decline since its peak in 1947 has leveled off and currently shows a gradual upward movement. It is a tribute to local leadership that increased holding power has been the mainstay of high school growth during the period of declining births. The accomodation of record elementary and secondary enrollments during the decade of the Sixties, under seemingly insurmountable odds in many school districts, is only a part of the true measure of gains in education under the State's Foundation Program.

It is hoped that this bulletin will be helpful to you in interpreting Kentucky education's many facets of growth to date and its great expectations for the Seventies. A truly eventful period of development lies before us as Kentucky joins in the nation's Bicentennial Anniversary in 1976. Your comments and suggestions for future releases of this bulletin series will be appreciated.

Lyman V. Ginger

Lyman V. Ginger
Superintendent of Public Instruction

ACKNOWLEDGEMENTS

A generous amount of credit for this seventeenth report of a continuing series on holding power and whereabouts of graduates should go to the high school principals of Kentucky and the several divisions in the Department of Education that collect, analyze, and report pupil data. Special recognition is due the divisions of Statistical Services and Computer Services for the continued development of an instant data retrieval system and the sharing of early preliminary reports from the school districts. The problems of Statistical Services in providing accurate and complete data on graduates were multiplied with the closing or merging of nine public and nine non-public high schools during the four-year period.

Special acknowledgement is also extended to the Bureau of Instruction; in particular D. C. Anderson and Conley Manning, directors, Division of Supervision, Accreditation, Organization and Division of Instructional Program Development, respectively for their cooperation and assistance in working with school districts and private schools where pupil and graduate data were incomplete. Grateful appreciation is also expressed to the Bureau of Pupil Personnel Services, especially Lee Tyler, director and Lois Johnson, principal clerk in the Division of Pupil Personnel Attendance and Accounting. Reports from this division each year make possible the analysis, consolidation, and verification of much common pupil data submitted in separate reports and on different reporting schedules.

Finally special thanks go to Research office staff members--Isabel Triplett and Brenda O'Brien who assumed major responsibility for collecting and verifying data, and organizing and typing the report.

INTRODUCTION

The seventeenth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools starting in 1956 has the enlarged purpose of providing an overview of a decade of growth (1960 to 1972) in addition to presenting the usual analysis of data for the graduating class of 1972.

In retrospect, the 1960-61 school year marked the beginning of a new era in public education in Kentucky with a record-breaking appropriation made possible by revenue from the enactment of a sales tax. While there are many dimensions of a comprehensive state-local-federal financing plan for providing full educational opportunity for children and youth, it is generally agreed that the ultimate criterion of adequacy of any plan is the quality and quantity of educational outcomes made possible through its operation. The Class of 1972 is the first graduating class having full advantage of a twelve year program under a fully-financed Foundation Program.

Using the first year of the decade of the Sixties as base-line data and the graduate output for current year (1972), the following comparisons point up for selected measures for twelve-year growth and expansion of the high school program in Kentucky.

The increase in the number of all high school graduates for the Class of 1972 as compared to the Class of 1960 is 15,319 or 59.6 per cent.

The increase in births in the corresponding years 1954 and 1955 (Class of 1972) as compared to 1942 and 1943 (Class of 1960) was 17,138 or 13.1 per cent.

The percentage of all graduates in 1960 in terms of total ninth grade enrollment four years earlier was 62.8 per cent. Comparable holding power for the Class of 1972 is 70.7 per cent.

The increase of graduates in the Class of 1972 over the Class of 1960 directly attributed to increased holding power, is 5,020 or approximately one of nine graduates in the class of 1972.

The number of complete public high schools in local school districts with graduating classes was decreased from 393 in 1960 to 293 in 1972--a decrease of 100 schools or 25.5 per cent.

The number of complete public high schools, having a graduating class of 100 or more increased from 64 public schools, or 16.3 per cent in 1960, to 147 high schools, or 49.2 per cent in 1972. (See Charts 5 and 6).

The number of complete public high schools in 1960 with graduating classes less than 30 in size was 112 or 28.5 per cent of total schools; in 1972, there were 21 schools, or 7.0 per cent of total schools in this category (Charts 5 and 6).

In 1960, the 64 high schools with graduating classes of 100 or more enrolled 43.9 per cent of total ninth grade enrollment four years earlier, produced 43.6 per cent of total graduates, and reported 49.6 per cent enrolling in college in the fall term following graduation. (See Chart 5).

In 1972, the 147 public high schools with graduating classes of 100 or more enrolled 77.9 per cent of total ninth grade four years earlier, produced 79.2 per cent of all graduates, and reported 81.3 per cent of total graduates enrolling in college in the Fall of 1972.

A comparison of Kentucky and National survival ratios for 1960 and 1972 reveals the following grade level changes in the twelve-year span:

	Kentucky Survival Ratios Per 1,000		
Grade	1960	1972	Change
Nine	1,000	1,000	--
Ten	867	917	+ 50
Eleven	753	818	+ 65
Twelve	657	737	+ 80
Graduates	628	707	+ 79

	National Survival Ratios Per 1,000		
Grade	1960	1972	Change
Nine	1,000	1,000	--
Ten	924	967	+ 43
Eleven	825	896	+ 71
Twelve	738	823	+ 85
Graduates	687	781	+ 94

1. Derived data. Source: Digest of Educational Statistics, 1971 Edition. U. S. Office of Education, p. 9.

A comparison of Whereabouts of Graduates of all Kentucky high schools, 1960 and 1972, reveals the following changes in a twelve-year span in the standard categories for which principals provide data:[1]

	1960	1972	Change	% Change
College or University	10,759	18,484	+ 7,725	+71.8
Trade, Technical, Nursing School	1,382	3,422	+ 1,155	+50.9
Business School	885			
Sales or Office	3,928			
Farming	1,321	12,032	+ 4,319	+56.0
Factory or Trade	2,464			
Other Employment Including Military	2,414	1,404	-1,010	-41.8
Not Employed or at Home	4,409	3,078	-1,331	-30.2
Unknown	1,716	3,741	+2,025	+118.0
Other	--	2,685	+2,685	--
Total	29,278	44,846	+15,568	+53.2

In the Fall of 1960, 13,026 or 44.5 per cent of June graduates were reported entering a formal program of education beyond the high school. Twelve years later, principals reported 21,906 or 48.8 per cent of the 1972 graduates enrolled in a post-secondary program--college or university, trade, technical, nursing school or business school. A graphic portrayal of the growth pattern is shown on the following facing pages.

1. Revision of Principals' Annual Report in 1966 resulted in changes in categories reported on by principals which limit the comparability of items to broad approximations except for "college or university."

Source and Interpretation of Data

There are two primary sources of data on public high school graduates; the principal's annual report and the superintendent's end-of-year report. Statistical data on number of graduates in the principal's report in October may vary from end-of-year enrollment data in the statistical report of the superintendent submitted at the close of the school year on June 30. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only whereas this report accounts for all graduates of public and non-public high schools in the state.

A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollments in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade. State data are taken from Kentucky High Schools, annual publication prepared by the Bureau of Instruction.

Reporting the Data

Charts 1 and 2 on preceding facing pages portray the rapid growth of secondary education in the Sixties. The Highlights section provides a brief summary of tabular data and comparisons with state and national norms.

Part I presents current data on holding power and graduates of public and non-public schools in Tables 1 thru 4. Trends and related data are shown in Part II. A special section of Part II deals with a comparison of the relationships of the number and size of public school graduating classes in 1959-60 with the current years, 1971-72. A comparable summary is provided for non-public high schools.

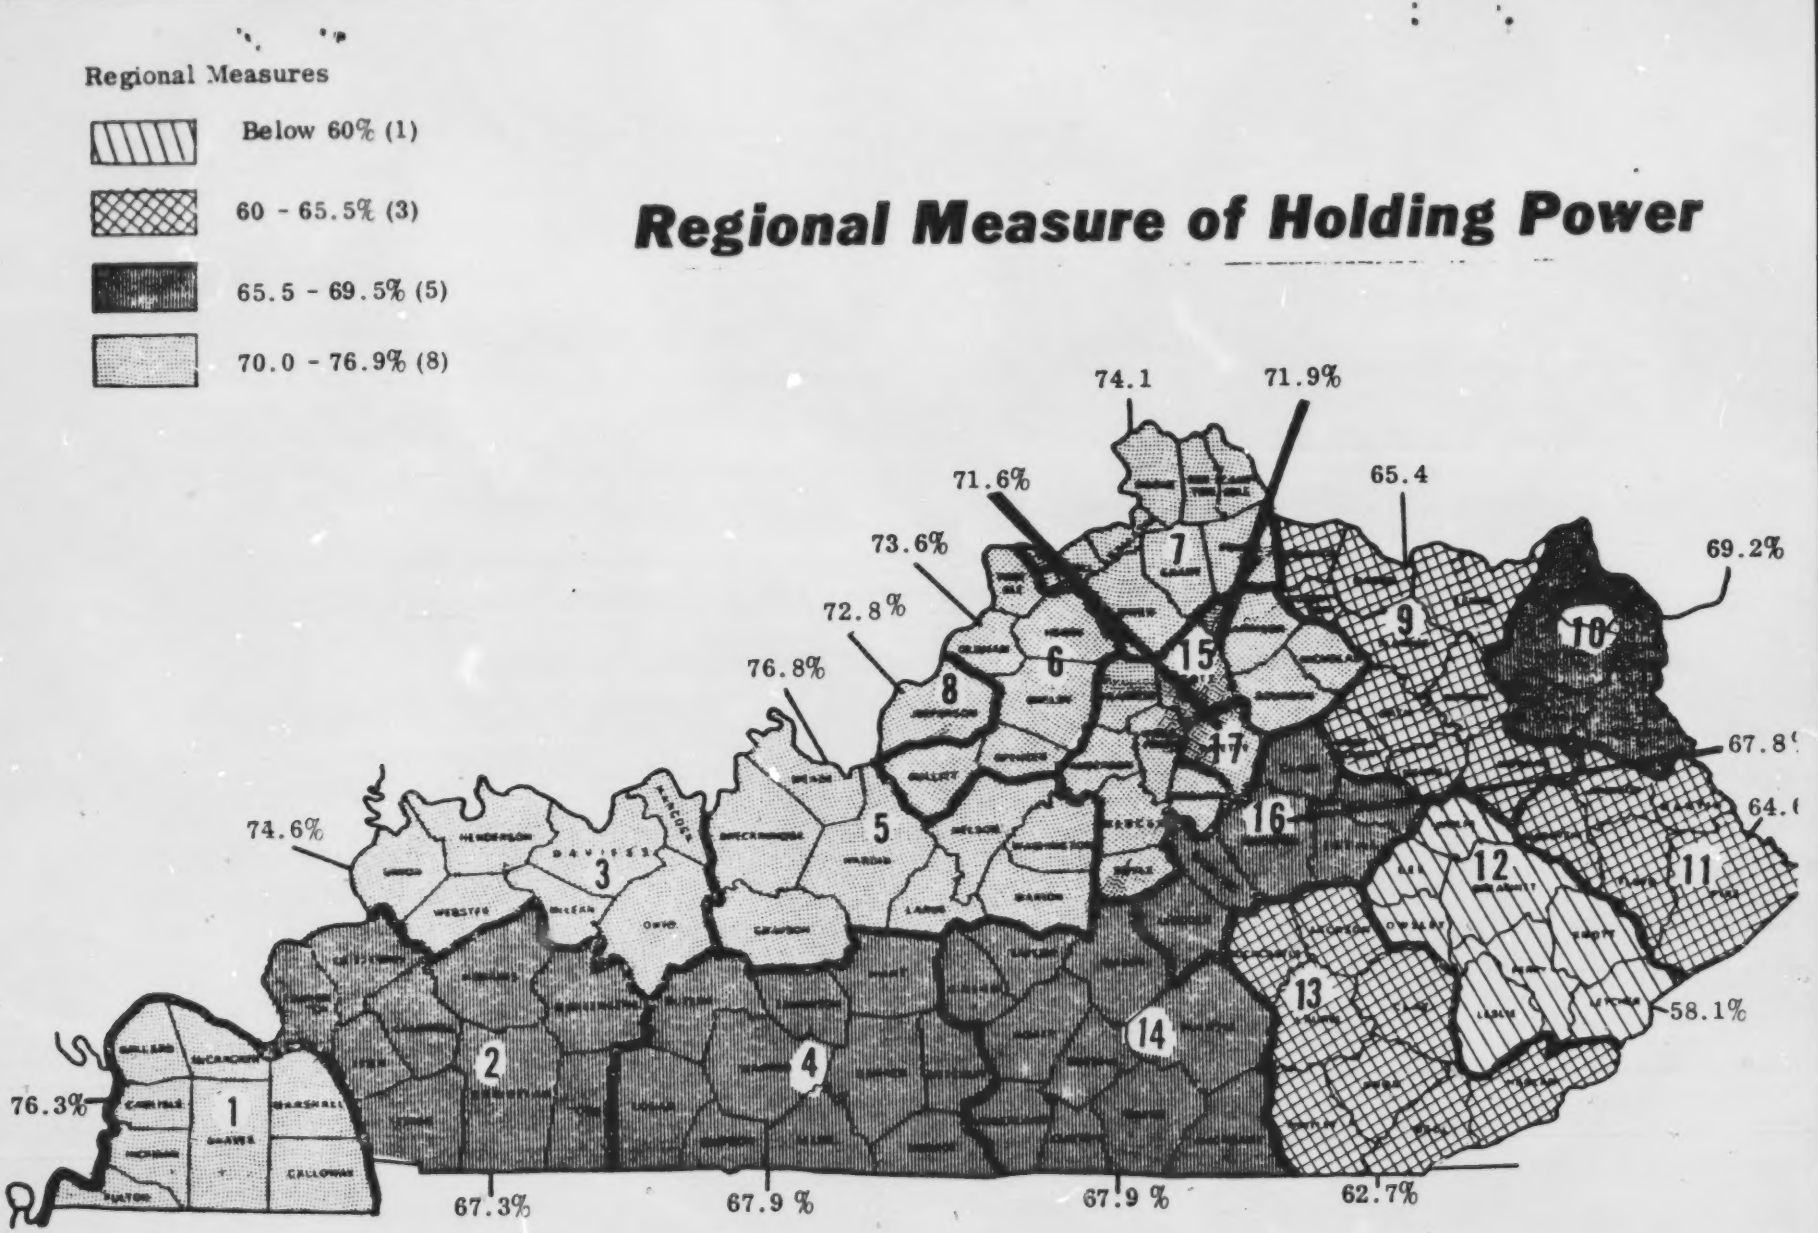
Regional Measure of Holding Power



Map-Chart 1. Ninth Grade Public Enrollment (1968-69) Completing High School (1972)

HIGHLIGHTS

In 1971-72, from the 299 complete public high schools (including six regional and federal high schools, there were 41,040 graduates, or 70.2 per cent of the total number of 58,489 ninth grade enrollment in 1968-69. Of the total graduates, 20,377 or 49.7 per cent were boys and 20,663 or 50.3 per cent were girls.

From the 51 non-public high schools, there were 3,806 graduates or 77.2 per cent of the total number of 4928 ninth grade enrollment in 1968-69. Of the total graduates, 1,857 or 48.8 per cent were boys and 1,949 or 51.2 per cent were girls.

From the total public and non-public high schools, there were 44,846 graduates, or 70.7 per cent of the total number of ninth grade pupils enrolled in 1968-69. Of the total graduates, 22,234 or 49.6 per cent were boys and 22,612 or 50.4 per cent were girls.

Of the graduates of public high schools, there were 16,291 or 39.7 per cent reported as enrolling in college or university. Of this number 8,061 or 19.6 per cent were boys and 8,230 or 20.1 per cent were girls.

There were 2,193 graduates, or 57.6 per cent of the total graduates of non-public high schools, reported enrolling in college or university. Of this number, 1,208 or 31.7 per cent were boys and 985 or 25.9 per cent were girls.

From all high schools, there were 18,484 graduates, or 41.2 per cent of the total number of 44,846 graduates, reported enrolling in college or university, Fall 1972.

Reported enrolling in some type of formal education program beyond the high school including trade or special school were: public school graduates, 19,472 or 47.4 per cent of total public graduates; non-public high schools, 2,434 or 63.9 per cent; and for all high schools; 21,906 or 48.8 per cent of total graduates.

The average survival rate per 1,000 ninth grade enrollment (1968-69) for all high schools was: tenth grade, 917, eleventh grade, 818; twelfth grade, 737; and graduates 707.

Seventy and seven tenths (70.7) per cent of the total ninth grade enrollment four years earlier completed high school in 1971-72.

For all Kentucky high schools, 41.2 per cent of all graduates in June, 1972 were reported enrolling in college or university in the Fall of 1972.

For all Kentucky high schools, 291 per 1,000 ninth grade pupils completed high school and enrolled in college or university.

Age of Public High School Graduates

Wide variability in age of public high school graduates in 1960 and earlier years as compared to 1972 has been reduced as shown by the lower and upper extremes of the age distribution for 1960 and 1972. (See Tables

In 1960, 84.1 per cent of the 24,911 graduates were at ages 17 and 18. Of this number, 46.5 per cent of girls and 39.7 per cent of boys were graduated at age 17. Graduating at age 16 or under were 5889 girls (4,5%) and 366 boys (3.1%).

In 1972, ages 17 and 18 were more heavily favored as the normal ages for boys and girls as these brackets climbed to 89.8 per cent--43.3%, age 17: and 46.5%, age 18. The number of graduates at age 16 or under was reduced to 78 boys (0.4%) and 167 girls (0.8%) as compared to 1960 with 366 boys (3.1%) and 588 girls (4.5%).

In 1960, 84.7 per cent of boys and 90.9 per cent of girls had completed high school by age 18. In 1972, these percentages had increased to 87.0 per cent for boys and 93.7 per cent for girls.

What about the holding power of Kentucky high schools for boys and girls graduating beyond age 18?

In 1960, 1836 boys or 15.3 per cent of total graduates, continued in school beyond age 18 to graduate. Comparable data reveal that 1177 girls, or 9.0 per cent of total, remained in school beyond age 18 to graduate.

With higher rates of graduation at 18 and below, comparative data on graduation experience beyond age 18 reveal an increase in number of students over 18 staying in school:

1) Boys -- 2,593 of 19,973 graduates, 13.0%.
2) Girls -- 1,198 of 20,469 graduates, 5.9%.

Summary Graduation Experience Beyond Age 18

	Boys				Girls			
	1960		1972		1960		1972	
Age	No.	%	No.	%	No.	%	No.	%

21	122	1.0	113	0.6	70	0.5	49	0.2
	1,836	15.3	2,666	13.0	1,177	9.0	1,198	6.3

Changing Senior Class Size

In 1959-60, Kentucky public school districts operated 393 complete high schools with 112 schools, or 28.5 per cent, having graduating classes with less than 30 graduates, and 64 schools, or 16.3 per cent, having graduating classes of 100 or more members (Chart 5).

The 112 smaller schools produced 2,190 graduates or 8.5 per cent of all public high school graduates in 1960, the 64 larger schools accounted for 11,215 or 43.6 per cent of total graduates. (Chart 5)

The smaller schools (112) had a holding power of 59.6 per cent, and reported 25.9 per cent of graduates enrolling in college; the larger schools (64) had a holding power of 61.4 per cent, and reported 40.0 per cent of graduates enrolling in college. (Chart 5)

The average size of graduating classes for the 112 small schools was 19.6, the range from 3 to 29; the average size of graduating classes for the 64 large high schools was 175; the range 100 to 507. (Chart 5)

In 1971-72, there were 299 complete public high schools with 21 schools, or 7.0 per cent having graduating classes with less than 30; and 147 schools, or 49.2 per cent, with graduating classes of 100 or more members (Chart 6).

The 21 small schools produced 467 graduates or 1.1 per cent of total graduates; the 141 large schools, 32,513 graduates or 79.2 per cent of all graduates. (Chart 6)

In twelve years, the schools with less than 30 graduates showed an increase in holding power from 59.6 to 61.5 per cent, and reported 127 or 27.2 per cent of their graduates enrolling in college as compared to 25.9 per cent in 1960. (Chart 6)

The 139 large schools having 100 or more graduates showed an increase in holding power from 61.4 to 71.4 per cent, and reported 13,250 or 40.8 per cent of their graduates enrolling in college as compared to 40.0 per cent in 1960 (Charts 5 and 6).

In 1972, the average size of graduating class for the 21 schools with graduating classes of 29 or less was 22.4; the range from 13 to 29; the average size class for 147 large schools was 221, the range from 100 to 588. (Chart 6)

In 1972, there were 51 non-public high schools with 20 schools, or 39.2 per cent, graduating classes of less than 30, and 15 or 29.4 per cent having graduating classes of 100 or more (Chart 7).

The 20 small schools accounted for 355 graduates, or 9.3 per cent of all graduates; the 15 large high schools produced 23,181 graduates, or 62.6 per cent of all non-public graduates (Chart 7).

PART I

HOLDING POWER AND GRADUATES

The three basic tables in Part I provide a comprehensive overview of the number and whereabouts of graduates of all Kentucky public and non-public high schools, separately and combined, for the school year 1971-72. The 63,417 ninth grade public and non-public high school students in 1968-69 were enrolled in 371 complete high schools, 50 junior high schools, and 8 incomplete high schools. Of the total number of entering ninth grade students, 44,846 or 70.7 per cent were graduated from 348 complete high schools in 1972. The distribution of all Kentucky high schools in 1969 and 1972 by type of organization and control is shown in the following summary:

Type of Organization	Type of Control									
	County District		Independent District		Private and Parochial		State, Fed. & Regional		Total	
	71-72	68-69	71-72	68-69	71-72	68-69	71-72	68-69	71-72	68-69
Grades 9-12	152	156	28	32	39	51	2	3	221	242
Grades 7-12	52	52	30	32	6	4	3	5	91	93

Source of data: State Bulletin Series, Kentucky High Schools, Vol. XXXVII (July, 1969), and Vol. XL (July, 1972), Kentucky Department of Education.

Table 1-A presents data by school district, county, and region for 41,040 public high school graduates representing 293 high schools in county and independent districts and six special high schools. A further grouping of public school data by 17 educational development districts (EDDs) is shown in Table 1-B.

In Table 2, a summary of holding power and whereabouts of public high school graduates is provided by county units within the state's regional framework (EDDs) in order to relate educational planning and development more closely to identified needs of social and economic development within the compatible framework of Area Development Districts (ADDs).

Comparable analysis and reporting of non-public high school data by county and region are presented in Tables 3-A and 3-B.

Table 4 provides a comprehensive overview by county and region of total ninth grade enrollment, all public and non-public graduates, and total graduates to college as reported by principals to the Bureau of Instruction. A special feature of Table 4 is the survival ratio of ninth grade per 1,000 enrolling in college and its general implications for curriculum development.

PART II

TRENDS: HOLDING POWER AND RELATED DATA

The brief trends data on holding power and graduates in this section, even of short duration, provide useful benchmarks for appraising extent and rate of change in secondary education in Kentucky. Though limited to measures of quantity only, the data provide important indices to aid in high school program evaluation and as a base for further curriculum study.

Indication of Holding Power

As a general measure of holding power, Tables 5, 6, and 7 provide a concise summary of the ten graduating classes of public, non-public, and combined high schools from 1963 to 1972. The majority of graduates of 1972 were enrolled in the first grade in the school year 1960-61--fifth year of the Foundation Program Law of 1956.

Table 5 presents state-wide data for public school districts on survival rates and whereabouts of graduates of public high schools for ten graduating classes, 1963-1972 inclusive. Corresponding data for non-public high schools are presented in Table 6.

Table 7 shows the combined data for all high schools and provides, in terms of enrollment and holding power, a measure of the growth of the total secondary program in Kentucky.

Size of Graduating Classes

The practice of documenting progress by including trends data on four general measures of a secondary school is continued in this report. The first analysis of relationships of size of school, ninth grade enrollment, number of graduates, and

graduates entering college was reported in 1961 for the class of 1960.[1] These base-line data for public high schools are reproduced in Table 8 with graphic portrayal of the data shown in Chart 6. The 1960 report has historical value in that it was the first year of full financing of the Foundation Program Law. The same variables for the class of 1972 are recorded in Table 9. Graphic portrayal of the data is provided in Chart 7.

Focus on the size of graduating classes as an indicator of the degree of breadth of program that might be expected in an average comprehensive high school was emphasized by Conant in his initial study of The American High School Today.[2] One characteristic of a modern comprehensive high school advanced in the first Conant report of 1959 is that it should have a minimum of one hundred students in the graduating class in order to provide, at a reasonable cost, a basic program of education for all youth in its general attendance area. Estimates on Kentucky public high schools for 1957-58 as reported by Conant, final data for 1957-58, and current data for 1972 are shown below.

Year	Total No. 12th-Grade Students	12th Grade Students in Schools with 12th-Grade Enrollment of Less than 100		Total No. Schools Offering Diplomas	Schools Offering Diplomas with 12th-Grade Enrollment of Less than 100	
		Number	Per cent		Number	Per cent
1957-58[a]	22,860	14,835	65	423	386	91
1957-58[b]	23,551	15,187	65	413	365	88
1966-67	37,651	10,387	28	320	186	58
1971-72[c]	42,463	8,102	20	293	131	45

a) Estimated Conant Report b) Final Data c) Excludes State and Federal Schools (6)

1. Department of Education. Graduates Kentucky High Schools, 1960. (Frankfort, Ky.: State Department of Education). Educational Bulletin, Vol. XXIX, No. 5, 1961.

2. James B. Conant, The American High School Today (New York: McGraw-Hill Book Co., 1959) p. 132.

The relationship between the size of high schools and the scope of their curricular programs has been conclusively established by research. Flanagan's report on Project Talent is representative of findings:

> It would seem that larger school size is a proper and important objective in order to provide a greater variety and depth of course offerings and to make available special services such as grouping, acceleration, guidance, etc . . . Size of school is very important insofar as it controls course offerings and services.[1]

From the Kentucky data, it will be observed that a dramatic reversal has taken place in the number of graduates from small and large high schools in a relatively short span of time. Mergers and consolidations have enabled local school districts to reduce the number of schools offering diplomas from 423 schools (Conant Report) in 1957-58 to 293 schools in 1971-72--a reduction of 130 schools or 30.7 per cent--reflecting a combination of increasing enrollment and consolidation of schools since 1958.

The data on relationships of size of school, ninth grade enrollment, and graduates to college for the non-public school classes of 1972 are shown in Table 10. A graphic summary by four broad graduation size groups is provided in Chart 8.

County-Wide Summary Data

By way of a final summary, the three measures used throughout the report--holding power, graduates, and survival rate of ninth grade to college--for public and non-public schools are consolidated into two tables showing relative standings of counties as geographic units in a "standard nine" distribution, (See Tables 11 and 12).

Concluding Tables 13 and 14 present a comparative analysis of public high school graduates by age, sex, and type of school district for the school years 1960 and 1972.
